

Employee Attendance and Leave Tracker

Mini Project for CRT Training
Student-Friendly Overview

Problem Statement

- Organizations struggle to manage employee leave requests manually. The system automates leave applications, approvals, tracking, and reporting.

Methodology / Approach

- • Employee submits leave request
- • Manager reviews request
- • System validates leave balance
- • Database stores records
- • Dashboard tracks leave history

Results / Outcome

- • Faster leave processing
- • Reduced paperwork
- • Better transparency
- • Accurate leave records
- • Improved employee experience

Conclusion

- Employee Leave Management System improves efficiency, reduces errors, and provides a scalable digital solution.
